

## Summary of our Services:

**Our services are completely free, discreet and confidential.**

We believe in helping and educating those that desire our help. Our approach is skeptical, systematic, logical, and of course FUN.

We are NOT ghost busters as we do not get rid of ghost, and we do not "cleanse" buildings and structures. We do, however, try to recreate events and try to find root cause of events that might have been witnessed.

We firmly believe, that if ghost do exist, then they have the right to be where they are. We also believe that they do not have the right to scare and torment people and we will deal with these situations accordingly.

Our goal is two fold:

- 1.) to prove or disprove the existence of ghost through the elimination of data,
- 2.) to assist people in trying to cope with the experiences they are having.

"...when you have eliminated the impossible, whatever remains, however improbable, must be the truth."

**Sir Arthur Conan Doyle**, (Sherlock Holmes) British mystery author & physician  
(1859 - 1930)

## FREE, DISCREET and CONFIDENTIAL Investigations

### Who we are:

We are a group of Paranormal Investigators and Researchers located in Mobile, Alabama that are dedicated to the study of advanced paranormal phenomena that is ghostly in nature. We are a non-profit organization that believes in helping and educating those interested or troubled by ghost and ghostly phenomena.

We believe in the use of scientific methods, systematic processes, skepticism and logical thinking for data collection and analysis. As re-

searchers, it is important for us to realize that paranormal research is an ever-evolving field of study, so we try to keep open minds to other theories and methodologies. We believe this is one, of many, characteristics of GHOTS that adds to our success.

### Our Desire:

Following in the footsteps of such great researchers as Harry Price, and Sir Arthur Conan Doyle our desire is to present to the community information in a manner which is fun, informative, and educational.

It is our desire that with our data we can make strong correlations of paranormal events and behaviors and begin to help build a better understanding of alleged ghost's and haunting's. Only through the continued focus and field-testing of theories shall we eventually bring paranormal research into the scientific mainstream.

### Being Haunted?

Do you have a haunting going on, or know of a place that does? How do you know? We've all seen stuff out of the corner of our eye and heard that ominous bump in the night. The signs of a haunting are not always that easy to detect and determine. Some key items that might allude that there is a haunting going on are:

- Unexplained Noises
- Doors, cabinets, and cupboards opening and closing
- Lights turning off and on
- Unexplained shadows
- Strange animal behavior
- Feelings of being watched
- Disassociated voices, crying, whispering, etc.
- Cold or hot spots
- Unexplained smells
- Being touched, slapped, or scratched when no one else is around.

This is not the end all list, but rather an example of events that might go on with a place that is haunted. Some of the events can be so small that one hardly knows it's happening, while others are so overt that a person becomes scared.

### When to contact us:

Contact us any time; whether it be out of curiosity, or especially if you are scared. We will offer our services, free of charge, to get to the root of the problem and help you handle what is going on. Keep a journal of vents that pays strict attention to the times at which the events occur.

*Abandoned house in Kushla Alabama*

### The Process:

Below is the high level process we use to begin conducting our investigation:

*Historic home in Kushla, Alabama*

- Detailed phone interview
- Preliminary walk-through and personal interview
- Historical research and background check if applicable
- EMF radiation survey of the property with video/still camera documentation
- Documentation and discussion of the data found with other group members
- Subsequent targeted investigation
- A conference with the client which includes professional consultation/counseling
- Follow up in the near future

Ghost Hunters of the South does **NOT** employ the following methods for investigation:

### Ouija boards, Séances, Channeling, Dowsing or any form of divination

The primary reasons why is because these activities are not recognized as scientific or objective. While we do pay attention to "gut feelings" and respect the vibes and impressions that we get from the world around us, we are careful to evaluate all of our senses and weigh their relative value in context of the situation.

Ghost Hunters of the South treats every investigation confidentially, scientifically and logically so we are not given to flights of fancy. We will give you an honest, sober evaluation of what is going on along with SUGGESTIONS on how to cope with your particular situation.

If you feel that you require the services of a psychic, GHOTS can refer you to individuals who will treat you with professionalism, honesty and respect.
